Professor Joshua Lederberg

Dear Senator Fulbright

I would be grateful to you
for further information on:

Texts of the hearings on
psychological aspects of foreign
policy.

I am very much gratified that
you are looking into this.

As you know, the DOD has had
an inappropriate monopoly over
research grants in these areas;
and it is not obvious that State
would be better able to sponsor
the critical and independent inves-
tigations that are so badly needed.

Unfortunately, efforts to place
corresponding funds in the NSF and
similar agencies have not had the
same success as the criticisms you
have spearheaded against the DOD.
